DETAILED ACTION

Claims 16-21 are pending and subject to restriction.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claims, 16-18, drawn to a microorganism that is able to utilize cyclopentene derivatives of formula VII as sole N, C or both sources and extracts thereof, classified in class 435, possible subclasses 243 through 259 depending on family and genus of the microbe.

Group II, claims, 19-21, drawn to an enzyme which has N-acetyl-amino-alcohol hydrolase activity obtainable from the microbes of Group I, classified in 435, subclass 227 and others.

The inventions are distinct, each from the other because of the following reasons:

The inventions are two distinct compositions. One is a microbe, the other is an enzyme. The enzyme is NOT REQUIRED to be obtained from the microbe and may be obtained from any source. The enzyme is only required to be "obtainable" from the microbe, which is functional language.

The several inventions listed above are independent and distinct from one another as they have acquired a separate status in the art and require independent searches, particularly with regard to the literature searches. Clearly, a reference which would anticipate one of the above groups would not necessarily anticipate or even make obvious the other.

An undue burden would ensue from the examination of multiple compositions which have distinct characteristics. Burden lies not only in the search of US Patents, but in the search for literature and foreign patents and examination of the claim language and specification for compliance with the statutes concerning new matter, distinctness and scope of enablement.

Because these inventions are distinct for the reasons given above restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1651. The supervisor for 1651 is M. Wityshyn, (703) 308-4743. The normal work schedule for Examiner Saucier is 8:30AM to 5:00PM Monday and Tuesday and 8:30 AM to noon on Wednesday.
